

Client Profile

An INR 300 crore company with the capacity to produce 1.07 million tonnes of cement per annum.

Leading Cement Company

SAP R/3 4.7EE SAP SLO (SAP Landscape Optimization)

Business Requirement

- To separate the configuration, master and transaction data of the company code from the combined SAP R/3 4.7EE instance of previous owners using the SAP Landscape Optimization Services (SAP SLO)
- Helping the company with integration, regression and UAT testing by fixing issues identified during the separation process
- Coordinate with SAP, previous owners and the holding company to meet the project schedules

Intelligroup Solution

- Install SAP R/3 4.7EE on new hardware and restore a full offline backup of the previous owner's production instance to the new hardware
- Utilized the SAP SLO tool & services to delete the data related to all previous owner's codes from SAP standard tables and utilized our ABAP skills to delete the data relating to all previous owner's codes from the custom tables thus leaving the holding company's data in the system

Business Benefits

- The company was able to meet the major legal & business objective of a complete separation from the previous owner's SAP instance well before the deadline
- No business downtime for all of the other group companies belonging to the previous owner in the same SAP instance
- The users were able to continue with the same SAP environment, thus reducing the impact of the acquisition on day-to-day business
